### Northwest Territories Population – October 2013

On October 1, 2013 Statistics Canada estimated that 43,523 people were living in the Northwest Territories, a decrease of 0.2% from the previous year. By comparison, Canada's population increased by 1.2% over the same period. With the exception of the Northwest Territories and the Atlantic provinces, all other provinces and territories experienced positive growth between October 1, 2012 and October 1, 2013. Growth exceeded the national level in Alberta (3.5%), Nunavut (2.7%), and Saskatchewan (1.8%). Please note, these estimates are based on the 2011 Census, adjusted for census net undercoverage.

In total, the population in the Northwest Territories fell by 83 persons between October 1, 2012 and October 1, 2013. The components of natural increase consisted of 685 births and 198 deaths, resulting in a net increase of 487 persons. Inter-provincial migration accounted for 1,897 persons moving into the Northwest Territories from other provinces and territories, while 2,639 persons moved away, representing a net loss of 742 persons. Internationally, there was a net immigration of 172 persons.

In terms of quarterly growth, the NWT population decreased by 14 persons between July 1, 2013 and October 1, 2013. The population decline resulted from a net loss of 165 inter-provincial migrants offset by a gain of 140 persons through natural increase and 11 net international in-migrants. This was the ninth consecutive quarter of negative net interprovincial migration.

Similar to previous years, Alberta accounted for the largest number of net inter-provincial migrants in and out of the NWT between October 1, 2012 and October 1, 2013. Approximately 443 persons moved to the NWT from Alberta and 1,107 persons moved from the territory to Alberta, resulting in net loss of 664 persons (Figure 1). Ontario, on the other hand, made the largest net contribution of new migrants to the territory. It was estimated that 486 people moved to the NWT from Ontario, while 329 people moved from the territory to Ontario, amounting to a net gain of 157 people.

The detailed components of population change for the Northwest Territories since 2007 are presented in Table 2.

Note: Net International represents the net total of all Immigrants, Emigrants, Returning Canadians, Non-Permanent Residents and Individuals Temporarily Abroad.  
Error of Closure represents the difference in population change as measured by the individual components of growth and that observed using 2006, 2001 and 1996 census based population estimates.
